

IVECO WILL SUPPLY 21 HEAVY VEHICLES CNG

Valencia, 23th July ,2005

The Iveco Spanish branch, Iveco Pegaso S.L., has received an order from the FCC Group, for the supply of 48 vehicles for urban waste collection in the city of Valencia.

21 vehicles will be fueled- with compressed natural gas ; they will have a gross vehicle weight of 26 ton and a configuration of 3 axles (6x2x4), with a singlewheeled, steering tag axle, and automatic gearbox; the engine will be the Iveco 8469 CNG, with 9,5 liters displacement and 260 HP.

The engine has a gas multi-point electronic injection system, with stoichiometric combustion controlled by a closed Lambda probe circuit.

Thanks to this system, engine emissions comply with the Enhanced Environmental Vehicle limits which are, of course, much lower than those of Euro 4 & 5.

The remaining vehicles of the order will be: five 3,5 ton Daily; five 14 ton EuroCargo and fifteen 26 ton Stralis .
