

IVECO is sustainable mobility partner of the Taormina G7 Summit

IVECO BUS has officially delivered the vehicles it supplied for the transport fleet dedicated to the 43rd G7 Summit that will take place on May 26th and 27th in Taormina (Sicily)

Taormina, 25 May 2017

IVECO and IVECO BUS are sustainable mobility partners of the **Taormina G7 Summit**, under the Italian Presidency. IVECO BUS will supply for the event **three Daily Minibus – two powered by Natural Gas and one Electric** model – to ensure internal mobility of the delegations during the two days. All the vehicles have arrived in Taormina and are ready to transport delegations, ministers, officials and personalities attending the summit. The vehicles will also be used for the forthcoming events linked to the G7 Summit that will take place up until October in many Italian cities and will include the Environment Summit in June in Bologna and, in September, the Technology and Industry Summit in Turin.

IVECO and IVECO BUS are driven by their commitment to sustainability and their relentless focus on innovation and new technologies make the brands the ideal partners to undertake new paths towards more innovative alternatives for a sustainable mobility: low environmental impact vehicles with high technological content for greater safety.

The first vehicle, a **Daily Tourys** in its **Electric version**, not only represents the strong presence of IVECO BUS in sustainable energy but also the excellence of the brand: **Daily Tourys** has just been crowned **“International Minibus of the year” 2017** by the jury of the prestigious European International Bus & Coach of the Year Awards.

This "zero emissions" vehicle **in its full electric version**, a 16-seater with 7.120 m in length, is perfect for environmental-friendly, silent and comfortable shuttle services. Compared to the previous generation Daily Electric, this new model has a range of up to 110 or 160 km (with 2 or 3 batteries respectively), delivers a 25% increase in efficiency, and offers an additional 100 kg on the payload as well as a 20% longer battery life.

The two **Daily Minibus “Natural Power”**, featuring a sustainable CNG technology, deliver the same performance and transient response as its diesel equivalents. The 3.0 litre engine, with its 136 hp and best-in-class 350 Nm torque, suits every mission. Natural gas is today a mature, affordable and economically accessible technology that can provide immediate answers in addressing pollution issues – especially in urban areas – and reducing CO₂ emissions.

IVECO

IVECO is a brand of CNH Industrial N.V., a World leader in Capital Goods listed on the New York Stock Exchange (NYSE: CNHI) and on the Mercato Telematico Azionario of the Borsa Italiana (MI: CNHI). IVECO designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks, and vehicles for applications such as off-road missions.

The brand's wide range of products include the Daily, a vehicle that covers the 3 – 7.2 ton vehicle weight segment, the Eurocargo from 6 – 19 tons, the Trakker (dedicated to off-road missions) and the Stralis, both over 16 tons. In addition, the IVECO Astra brand builds off-road trucks, rigid and articulated dumpers as well as special vehicles.

IVECO employs close to 21,000 individuals globally. It manages production sites in 7 countries throughout Europe, Asia, Africa, Oceania and Latin America where it produces vehicles featuring the latest advanced technologies. 4,200 sales and service outlets in over 160 countries guarantee technical support wherever an IVECO vehicle is at work.

IVECO BUS

IVECO BUS is a brand of CNH Industrial N.V., a global leader in capital goods listed on the New York Stock Exchange and on the Borsa Italiana in Milan.

A major player in the field of public transport, and among the leading bus and coach manufacturers in Europe, IVECO BUS designs, manufactures and markets a broad range of vehicles that meets all the needs of public and private operators:

- school, intercity and tourism coaches (Crossway, Evadys and Magelys)
- standard and articulated city buses, including BRT dedicated versions, with a strong leadership in clean technologies such as CNG and Hybrids (Urbanway and Crealis)
- minibuses for all passenger transport missions (Daily)
- different chassis for bodybuilders.

IVECO BUS employs over 5,000 people across two production units, in Annonay, France and in Vysoké Myto, Czech Republic. Both factories were awarded the bronze medal in 2013 following their WCM (World Class Manufacturing) audits, an international methodology for managing manufacturing processes according to best standards worldwide.

The extensive IVECO BUS and IVECO service network guarantees assistance around the world wherever an IVECO BUS vehicle is at work.
