AIR FLOW SYSTEM

The original airflow system consists in a wide offer of spoilers and a specific aerodynamic kit designed for the fixed sport line spoiler. All roof spoilers guarantee an **excellent aerodynamic solution** to **reduce fuel consumption** and come in both fixed and adjustable versions. A **solid** but **lightweight design** comes into play thanks to the use of structural webbing and internal ribs coupled with resin. The inserts are treated to give **excellent mechanical strength**, thanks to the use of structural frames made from **corrosion-resistant materials** and installation is fast and simple. The aerodynamic kit is tested in the wind tunnel and on road to ensure enhanced fuel savings.
