

# REMANUFACTURED PARTS BACK TO THE FUTURE

NOTHING IS CREATED. NOTHING IS DESTROYED. EVERYTHING IS REMANUFACTURED.

**IVECO** | **Reman-Parts**  
REMANUFACTURED

# BACK TO HIGH QUALITY. JUST FOR YOUR VEHICLE.

**IVECO REMAN PARTS IS THE EVER GROWING AND EVOLVING LINE OF REMANUFACTURED PARTS, PURPOSELY DESIGNED FOR POST-WARRANTY VEHICLES, THAT BRINGS YOU STRONG BENEFITS IN TERMS OF QUALITY, PRICE AND CHOICE**

Choosing the Reman range ensures that the components fitted on your vehicle will be as efficient and performing as brand new units.

## OUR FEATURES

- Remanufactured components offering high quality that complies with Genuine Parts
- A rigorous disassembly, cleaning and re-engineering process
- Cutting-edge technology, tailored tooling and equipment, stringent quality testing
- A wide and expanding choice

## YOUR BENEFITS

- Cost-effective solution for ageing vehicles
- Guaranteed reliability, with the original component from the same model as yours
- Less downtime in the workshop, thanks to prompt availability and mounting simplicity
- 2 years warranty on engines and gearboxes and same-as-new warranty on other components

## WHY REMAN?

### IT IS SAVING MONEY!

With Reman you can save money compared to new replacement parts and reduce vehicle downtime, as remanufactured parts can be quickly fitted as an alternative to an overhaul or repair.

### IT IS GUARANTEED!

Every Reman part is restored to its Genuine performance through a carefully monitored process in compliance with stringent technical standards. That's why you can enjoy best-in-class 2-year warranty on engines and gearboxes.

### IT IS ENVIRONMENTALLY FRIENDLY!

The Reman range is the result of a sustainable remanufacturing process:

- Collection and identification of the old unit with disassembly and precise analysis of the individual components
- Remanufacture of as many components as possible to avoid the introduction of new materials in the process
- Replacement and proper disposal of components that do not pass the strict IVECO quality tests

## A FAST GROWING PRODUCT RANGE

Choosing the Reman range means having complete confidence that the components fitted on your vehicle will be as efficient as brand new units. In order to satisfy the increasing demand and to offer our customers new saving opportunities, the Reman range is continually evolving.

# THE FLOW OF SUSTAINABILITY

## REMANUFACTURING AND THE CIRCULAR LIFECYCLE

By adhering to the ideal circular flow of the remanufacturing process, IVECO Reman helps to keep used components out of landfills, offering cost-effective parts that are environmentally sustainable.

## THE KEY STEPS OF OUR REMANUFACTURING PROCESS

**1. DISASSEMBLING**

All cores are completely disassembled for inspection.

**2. CLEANING**

Each component is thoroughly cleaned and verified following the latest original new parts specifications.

**3. INDUSTRIAL RECONDITIONING**

All components are either brought back to Genuine parts specification or replaced with a new part.

#### 4. REASSEMBLING

The finished remanufactured part is reassembled.

#### 5. TESTING

The final product is tested to ensure the highest quality level.

#### 6. FINISHED REMANUFACTURED PRODUCT

Ready for the road,  
as if it was its first outing!

All the pictures of the current brochure were taken in our remanufacturing plant in Garchizy, France, with real workers.

# OUR COMMITMENT, YOUR BENEFITS

## FOR YOUR BUSINESS, FOR OUR ENVIRONMENT

Remanufactured parts are good for your bottom line, as well as the environment. IVECO Reman adapts to meet your changing buying habits and desires.

### SAVE ENERGY. SAVE MONEY

A remanufactured engine:

- Requires 80% less energy to construct than a new engine
- Costs up to 50% less than an original engine

### SAVE MONEY. SAVE THE ENVIRONMENT

Recycling used parts in mass quantities and rebuilding them:

- Saves money in the remanufacturing process
- Helps the environment by using less energy and reusing precious natural resources

### SAVE THE ENVIRONMENT. SAVE ENERGY

Remanufacturing conserves the equivalent of 400 trillion BTUs of energy each year. That's the same as:

- 350 tankers of crude oil
- Enough gasoline to run six million cars for a year
- The amount of electricity produced by eight nuclear power plants in one year

# VALUES BUILT FOR YOU

## INCREASED UPTIME

Get machines up and running faster with drop-in assemblies. There's no need to waste time or labour hours with complicated rebuilds from unanticipated problems.

## RELIABILITY, NOT LIABILITY

When working against a deadline, breakdowns are not an option. IVECO Reman parts are engineered specifically for IVECO vehicles, minimizing risks and improving mechanical dependability.

## WARRANTY PROTECTION

IVECO Reman parts carry a same-as-new or better-than-new warranty, so owners have the same - if not better - protection they would get from an OEM replacement part.

## GOOD AS NEW - AND EVEN MORE

Whenever possible, a core is machined and brought up-to-date with the latest specifications to ensure the product is as good as new.

## LOWERED TOTAL COST OF OWNERSHIP

In all machine life-cycle segments, the total cost of ownership is reduced.

## OUTSTANDING QUALITY-TO-PRICE RATIO

Built by trained technicians who build hundreds of the same products each year, IVECO Reman components cost up to 30% less than new ones, but offer the very same quality as brand new products.

## SUSTAINABILITY IS IN THE AIR

Remanufacturing saves more than 80 percent of the energy that would have been used to produce a new part, reducing about 28 million tons of carbon dioxide.

That's equivalent to the amount of carbon dioxide released by ten 500-megawatt, coal-fired electricity plants each year.

Don't waste the cores!

**You return them.**  
**We reman them.**
