### SMART PACK

## COMPREHENSIVE VEHICLE MONITORING BASED ON THE INFORMATION PROVIDED BY A SET OF TOOLS.

#### **SMART REPORT**

IVECO ON Customer Portal releases monthly reports that are automatically sent to the Fleet Manager to provide:

- Data on fuel consumption parameters and driver behaviour monitored through the DSE algorithm
- Mission profile monitoring
- Tips to improve driving style for fuel consumption and vehicle optimisation

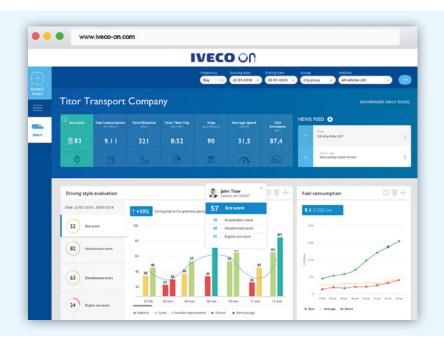

It is possible to display both the overall results of the entire fleet and the details of each vehicle to get a better understanding of how to optimise efficiency and reduce fuel consumption.

#### **SAFE DRIVING REPORT**

Together with the Smart Report, you will receive this new report that will allow you to measure your safety on board. The Safe Driving Report is created exclusively for you and it is free of charge. Thanks to the Driving Style Evaluation we will provide you parameters that will help you be more cautious and safe while on the road!

#### IVECO ON CUSTOMER PORTAL (INCLUDING THE APP)

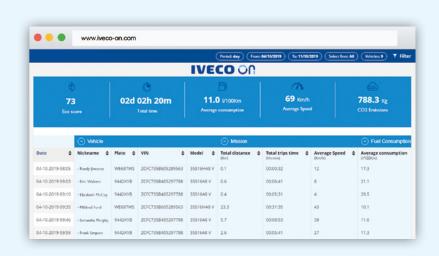

Through the IVECO ON Customer Portal, customers can monitor the vehicle's fuel consumption and the driver's driving style in order to optimise the fleet's performance.

A host of features help them take the best advantage of the data:

- Dynamic monitoring
- Historic data to make comparisons
- Downloadable details by vehicle/driver
- Customer Dashboard for Fleet Fuel Consumption monitoring
- Dedicated vehicle map by mission

Find out in the Marketplace section which additional services are available to you.

#### **VEHICLE MONITORING & REMOTE ASSISTANCE**

IVECO connectivity will help maximise your vehicle's uptime and productivity through a proactive approach with the Remote Assistance Service tool for remote diagnostics, teleservices and over-the-air software updates.

We help you get more time on the road by remotely monitoring your vehicle. If a warning about a component comes up, we receive a fault code alert and our connectivity managers will call you to advise on planning a stop at a workshop for the necessary service intervention.

Thanks to the connectivity and the fault alerting, IVECO can monitor your vehicle by anticipating unforeseen stops.

This service is intended for those customers who want to create their own dashboards and reports, using the IVECO official vehicle data. It allows flexible data integration in the customer's own systems and facilitates the management of IVECO-generated data together with that of other brands' vehicles in a single tool.

Microsoft stores the data from IVECO vehicles daily, in real time, on a cloud that aggregates the information for each customer, then makes it available on the customers' system. In addition to the information already shared on the Smart Report (vehicle status, DSE, GPS, ...), we also show you idling data in order to reduce unnecessary fuel consumption. You can choose one of the features below or all of them together:

• Geofencing • DSE • Vehicle Data

#### **PAY PER USE**

IVECO telematics technology allows you to optimise your costs. You pay the R&M contract upon subscription and, according to your actual mission and kilometers covered, you will only pay for the services you use and receive a refund for those that you did not. So you only pay for real time usage.

Try the new R&M PAY PER USE formula: it comes with the 2XL and 3XL Elements packages!
