Press Release

IVECO and Muscat Overseas supplies 16 IVECO T-Way units to Gulf Leading Logistics Services in Oman

IVECO and Muscat Overseas deliver to Gulf Leading Logistics Services 16 IVECO T-Way, the most reliable and productive heavy-duty truck to face the toughest off-road missions

Muscat,14th January 2026

IVECO and Muscat Overseas, IVECO dealer in Oman, just delivered **16 units of IVECO T-Way** to Gulf Leading Logistics Services (GULLS) at the facility of Muscat Overseas. A delivery ceremony was held for this occasion.

The 16 units are all **IVECO T-Way, model AT 720T47TH equipped with low bed semitrailer with generator and crane** and will join the GULLS fleet for the operation in oil fields.

GULLS company is specialized in the transportation of heavy machinery, lifting solution and tipping semitrailers.

Fouad Al Harthi, Founder and CEO of GULLS, commented: **"***We have good record with IVECO, that's why we chosen its vehicles for this heavy-duty mission. We look forward to strength the relation with IVECO and Muscat Overseas as we have several plans for 2026".*

Marco Torta, IVECO Business Manager for Oman, added: "*We have a long relation with Gulf Logistic Oman, that appreciates the performance and reliability of our trucks and the after sales operations assured by our dealer, that has one of the best team in the country".*

IVECO T-Way: the most reliable and productive heavy-duty truck to face the toughest challenges

The IVECO T-Way builds on the heritage of robustness and reliability of the brand's long lineage of champion off-roaders. It introduces state-of-the art technological solutions to exceed all expectations in **productivity, payload capacity, safety and driver comfort**.

“T” FOR TOUGH: designed and engineered for robustness and reliability

The IVECO T-Way has been designed to offer best-in-class performance in every off-road mission, **robustness and torsional rigidity**. It carries over from its predecessors the legendary robustness of the high-resistance steel chassis with a 10mm thick frame, with a Rail Bending Moment at the top of the segment at 177 kNm. The front axle has a maximum capacity of up to 9 tons.

Hub reduction on the rear axle is standard to maximize strength and performance.

The new heavy-duty rear suspension system for Tandem axles optimizes vehicle weight and improves off-road performance with greater ground clearance and a better departure angle.

The IVECO T-Way delivers all the **power** needed **for traction and PTO** with IVECO’s **reliable** and efficient Cursor 13 engine (13 litres) that develops up to 470 horsepower.

The engines are coupled with the proven **16-speed HI-TRONIX automated gearbox**, which now also features new functions specifically intended for off-road mobility including a Hill Holder function to help departure on steep slopes, Rocking Mode to help recover traction in slippery conditions and Creep Mode for ultra-low speed when idling; for the on-road sections of the mission, the **Ecoroll,** function that uses the vehicle’s inertia when travelling downhill enhances the transmission’s efficiency.

HI-TRONIX represents the state-of-art in the automated transmission sector and delivers the perfect gearshift strategy for every application.

IVECO

IVECO is a brand of Iveco Group N.V. (EXM: IVG). IVECO designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks and vehicles suitable for any body type.

It constantly innovates and extends its product portfolio to provide every customer with the vehicle that matches their mission precisely. IVECO’s full-line offer is designed around the Driver’s needs to ensure an excellent experience with a focus on safety and comfort. A wide range of advanced digital, connectivity-enabled services developed to help fleet owners run their fleet efficiently enhance IVECO’s complete transport solution.

IVECO pursues its decarbonisation strategy through a multi-energy approach that includes the further development of diesel and HVO, natural gas and bio-methane, battery electric and hydrogen technologies.
