IVECO eDaily wins Innovation and Efficiency Awards at Best Electric Van 2024 Competition

The eDaily is recognized for its performance, sustainability, and versatility in the commercial electric vehicle sector.

Turin, 22 November 2024

The eDaily was crowned at the Innovation and “**Efficiency Awards at the Best Electric Van 2024**” competition, praised by a jury of leading fleet managers for its advanced technology, efficiency, and suitability for a wide range of commercial applications.

This award, organized by Flote Auto magazine in collaboration with the Romania's Ministry of Environment, Water and Forests, confirms IVECO's commitment to innovation in the electric vehicle sector. The eDaily demonstrates that it is possible to offer fleet operators a robust and reliable electric vehicle without compromising on performance or durability. It is designed specifically to meet the sustainability and energy efficiency needs of today's fleet operators.

Best Electric Van 2024: a benchmark for the industry

The Best Electric Van 2024 competition, a key event for the commercial electric vehicle industry, gathered 11 of the most advanced models of electric vans for thorough testing. Over two days, vehicles were evaluated in real-world conditions, including urban and inter-city routes exceeding 300 km, with a focus on battery charging and energy efficiency.

The competition's jury assessed the vehicles on critical criteria such as cargo capacity, payload, range, energy consumption, and total operating costs. The eDaily was recognized for its superior fuel efficiency and innovative modular battery system, features that position it as an ideal solution for a variety of commercial uses.

eDaily: Designed for performance, flexibility, and sustainability

The eDaily stands out with its blend of electric drive benefits, flexible battery charging options, and the robust, durable design that has become synonymous with the Daily line. The vehicle is equipped with a powerful 140 kW engine, capable of speeds up to 120 km/h, and features the Hi Power function, which boosts performance based on road conditions.

The eDaily's flexibility is a key strength, offering configurations from 3.5 to 7.2 tons with the same towing capacity as its diesel counterparts. The modular battery system allows fleet operators to adjust both range and costs, while multiple charging options ranging from 11 kW to 80 kW ensure rapid recharging, even on long-distance routes.

The IVECO vehicle is not only a highly efficient electric vehicle but also offers advanced connectivity, allowing operators to remotely monitor charging and climate control, optimizing the vehicle's range and performance.

With its combination of technical excellence, driver ergonomics, and sustainability features, it is proving to be a game-changer in the electric commercial vehicle sector, making it a top choice for companies looking to reduce their carbon footprint while maintaining high operational efficiency.

IVECO

IVECO is a brand of Iveco Group N.V. (EXM: IVG). IVECO designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks and vehicles suitable for any body type.

It constantly innovates and extends its product portfolio to provide every customer with the vehicle that matches their mission precisely. IVECO's full-line offer is designed around the Driver's needs to ensure an excellent experience with a focus on safety and comfort. A wide range of advanced digital, connectivity-enabled services developed to help fleet owners run their fleet efficiently enhance IVECO's complete transport solution.

IVECO pursues its decarbonisation strategy through a multi-energy approach that includes the further development of bio-methane, battery electric and fuel cell technologies.

IVECO manages production sites in 7 countries throughout Europe, Asia, Africa, Oceania and Latin America. 3,500 sales and service outlets in over 160 countries guarantee technical support wherever an IVECO vehicle is at work.

IVECO drives the road of change by powering the transformation of the transport industry, propelled by the ambition to be the most reliable partner and full-line player for its customers.
