

RECOMMENDATIONS FOR USE

WHEN SHOULD THE WINDSCREEN WIPERS BE REPLACED?

Weather elements such as snow, frost and UV rays, together with windscreen washer fluid itself, cause premature wear to the wipers.

To guarantee optimum safety and visibility, IVECO recommends replacing the wipers **ONCE A YEAR**.

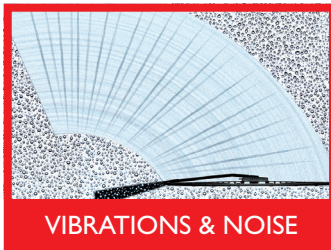

HOW TO SPOT THE FIRST SIGNS OF WEAR IF YOU NOTICE:

STREAKS

FILM

VIBRATIONS & NOISE

DIRTY PATCHES

HIGH PERFORMANCE

IVECO

THE KEY ROLE OF IVECO WINDSCREEN WIPERS.

For optimum safety and comfort, wiper efficiency is essential. The wipers must perfectly clear any snow and rain from the entire surface of the windscreen, withstand extreme temperatures (from -30 to +80° C) and the mechanical constraints of the wind in the weight of snow. **They must offer a clear field of vision in all circumstances.**

WHY CHOOSE IVECO WIPERS?

IVECO wipers are made entirely from metal and are fitted with a flexible rubber blade.

COMPOSITION OF IVECO WIPER BLADES.

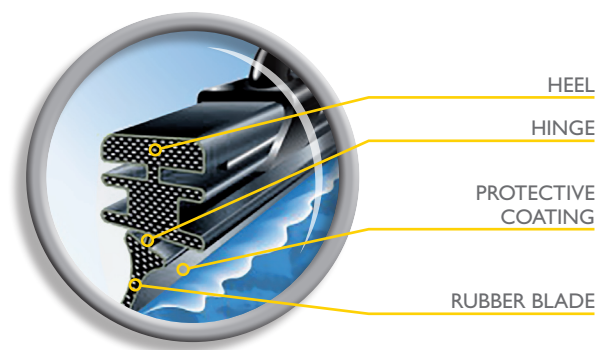

1	METAL SUPPORTING BRACKET & STRUCTURE	ROBUSTNESS
2	STAINLESS STEEL RIVETS	ANTICORROSION
3	PLASTIC SOUND ABSORBERS	SILENCE AND COMFORT
4	BRAND LOGO	GUARANTEED ORIGINAL

FOCUS ON WIPER BLADES.

The wiper blade – made entirely from rubber – provides flexibility and elasticity when wiping.

Thanks to its graphite coating, it guarantees:

- + Protection against external damage.
- + Reduced wear.
- + Smoother wiping.

CONCLUSION

ROBUSTNESS IN EXTREME CONDITIONS

FLEXIBLE WIPING MOVEMENTS

DURABILITY

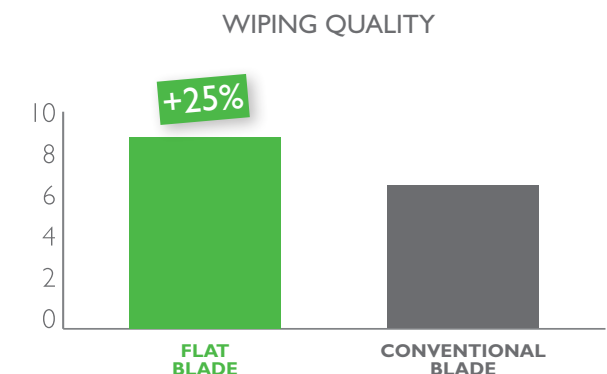

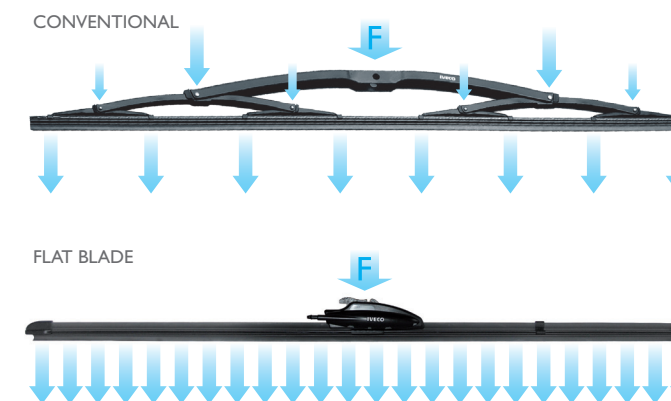

GO HIGH-TECH WITH THE FLAT BLADE.

Thanks to its structure of metal vertebrae which ensure **constant pressure on the area to be cleaned** (+1000 pressure points), flat blades offer perfect, silent wiping in extreme weather conditions. Fully interchangeable with a conventional blade for the same type of vehicle, flat blades operate **silently and comfortably even at high speeds.**

PRESSURE TEST ON A CONVENTIONAL BLADE & FLAT BLADE.

IVECO WINDSCREEN WIPERS: TRIED-AND-TESTED QUALITY.

Our blades are tested under extreme conditions to guarantee extended service life, driving comfort and high-quality wiping.

TESTS PERFORMED	RESULTS
LOW NOISE	SILENT WIPING
ENDURANCE	LONG WIPER LIFE
SALT CORROSION	PERFECT WIPER PERFORMANCE EVEN IN EXTREME WEATHER CONDITIONS.
COLD ROOM	
UV	
AERODYNAMICS	OUTSTANDING WIPING PERFORMANCE EVEN AT HIGH SPEEDS.

Did you know?

In durability tests, IVECO blades must be able to wipe effectively even after 500,000 cycles, the equivalent of over 200 hours non-stop.
