Colli Timber and Hardware grows IVECO fleet with new Daily 50C vans

Almost 20 years since Perth's Colli Timber and Hardware put its first IVECO Daily van to work, the company has welcomed its latest additions, two 12m³ Daily 50C models which are used for its 'Colli Xpress Onsite' service.

Operating from sites in Malaga and Mundijong, Colli Timber and Hardware was started in the late 1960s by Pietro Colli, a sawmill worker who identified a niche in the market to supply quality timber products to help fast-track construction in Perth and surrounding areas. Today the company is managed by Pietro's sons, Ces and Oriano, who together oversee a dedicated team of around 50 employees.

Major Account Representative, Jason Colli, is the third generation working in the family business, having begun there in 2000, so has been present during the company's long relationship with IVECO. In addition to the Daily vans – of which the company has had six over the years – the business also operates a Eurocargo and three Stralis models, which are used to deliver a range of hardware products including cladding, timber and trusses to customers.

"We began using IVECO in 2006 and over the time the vans and trucks have provided us with good, reliable service – they've never let us down," Jason said.

"Given this, when it was time to replace two of the earlier Daily models, we didn't have a need to go elsewhere – Daily had the track record."

Finished in the company's vibrant blood orange livery, the two vans which were purchased through AV Truck Services, play a vital role in Colli Timber and Hardware's Colli Xpress Onsite service, an offering that sees the Daily vans dispatched to worksites loaded with fast-moving materials and hardware, along with replacement equipment and hand tools catering to a variety of trades.

The service means tradies can stay on site and remain productive, leaving the Colli Express team to fill any shortfalls in materials and gear. The vans' loadspace includes shelving, racking and hooked display boards, while eftpos facilities allow efficient payment for customers. Depending on requirements, the new Daily vans also tow tandem box trailers for extra loadspace, which makes the vans' output of 180 horsepower and 430Nm of torque, and 3,500kg braked towing capacity attractive features.

"The Dailys give us the space and carrying capacity to provide a good service to our customers," Jason explained.

"We also chose automatic transmissions (8-speed full automatics) for the vans, which make them more comfortable and easier to drive – changing gears is one less thing our sales team have to worry about."

From their base in Malaga, the vans can travel up to 1.5 hours north and a similar distance south, meaning they can cover several hundred kilometres each working day across a range of metropolitan, urban and regional roads and traffic conditions.

Given the time drivers spend behind the wheel, Jason said the Daily's safety features and driver appointments were a priority for the business and well received by his team.

"Equipment such as the lane departure warning system and adaptive cruise control is liked by the drivers, and another feature that's been great – particularly when towing the trailers – is 'City Mode' (City Mode reduces steering effort by up to 70 per cent to assist low speed maneuvering)," he said.

"The vans are also smooth and quiet to drive; having used Daily vans since 2006 we've certainly noticed how each generation has gotten better and better."

Jason said Colli Timber and Hardware looked forward to continuing its long relationship with IVECO.

"They're good machines, very reliable and get the job done for us – the Dailys also look great on the road, we get a lot of positive feedback. These are the reasons we've stuck with IVECO and the Daily range for so long and will continue doing so," he said

IVECO

IVECO is a brand of Iveco Group N.V. (EXM: IVG). IVECO designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks and vehicles suitable for any body type. It constantly innovates and extends its product portfolio to provide every customer with the vehicle that matches their mission precisely.

IVECO's full-line offer is designed around the Driver's needs to ensure an excellent experience with a focus on safety and comfort. A wide range of advanced digital, connectivity-enabled services developed to help fleet owners run their fleet efficiently, enhance IVECO's complete transport solution.

IVECO pursues its decarbonisation strategy through a multi-energy approach that includes the further development of diesel and HVO, natural gas and bio-methane, battery electric and hydrogen technologies. It has established a global presence with a manufacturing footprint that includes 7 production sites and 8 Research and Development Centres. 3,300 sales and service outlets in over 160 countries guarantee technical support wherever an IVECO vehicle is at work.

Guided by its 'Spirito in Movimento', IVECO is transforming the transport industry, driven by groundbreaking advancements in technology, sustainability, and design, with the ambition to be the most reliable partner and premium, full-line player for its customers.

IVECO Australia

In Australia, IVECO offers commercial vehicles spanning the light, medium, and heavy-duty weight classes, such as the passenger car licence Daily van and cab chassis, Eurocargo in the medium segment, and ACCO and S-Way in the heavy market. Along with road-going models, IVECO has one of the largest off-road ranges in Australia with models including Daily 4x4, Eurocargo 4x4 and the T-Way which is available in 4x4, 6x6, 8x8 and 8x4 configurations.

All models combine the latest technologies from Europe with extensive local engineering and testing to ensure vehicles thrive in demanding local conditions. IVECO is also a leader in alternative fuels and propulsion systems and is currently trialling its battery electric eDaily models with prominent Australian fleets.
