

# RECOMMENDATIONS FOR BODY PARTS MAINTENANCE.

If you notice a crack in the bumper, have it checked and repaired immediately, before the damage gets worse and replacement is necessary

Dirty headlamps not only reduce visibility but can also dazzle oncoming traffic. Ensure that they are cleaned regularly, but never with a dry cloth which could scratch the lens.

If you have a chip or split in your windscreen, have it repaired or even replaced immediately. If left untreated, there is the increased risk of MOT failure.

Did you know?

To make sure the bumpers are airtight, Iveco also tests the screws and the securing devices: even the smallest parts can make the difference!

Headlamp type approval is subject to the use of the correct bulbs. If this is not the case, headlamp approval will be invalid, and it will be illegal for the vehicle to travel on public roads.

The original windscreen which perfectly fits the vehicle's frame it is made for, insulates the cabin, reducing air conditioning use and contributing in fuel saving.

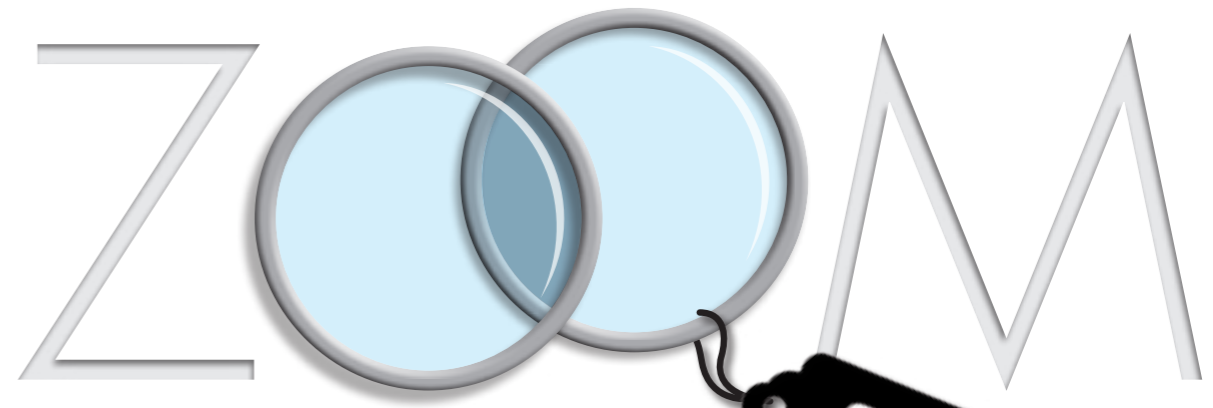

## WHY DO LOW QUALITY PARTS COST LESS?

- ! Low quality or recycled raw materials.
- ! Uncertified production processes.
- ! Inadequate production tooling.
- ! **CHOOSE ORIGINAL PARTS, CHOOSE SAFETY. GUARANTEED.**

## ORIGINAL IVECO BUMPERS: CLEAR BENEFITS.

For its bumpers Iveco only uses high quality polymers that have not been recycled. Strength, lightness and flexibility combined with superior assembly precision are the winning properties of each Iveco bumper.

**We have the evidence:**

### ORIGINAL IVECO BUMPERS

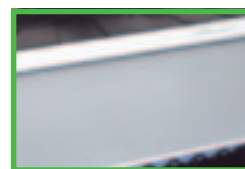

Subjected to deformation tests, the original replacement parts keep their initial dimensions.

### LOW QUALITY BUMPERS

The same testing demonstrates that low quality products have considerable deformation.

The original bumper passes the cold impact test without any damage.

On low quality bumpers, we can see the damage caused on the front panel and in the grille area.

**More resistant to stress and high temperatures resulting in a safer and longer lasting product. More fuel efficient because they are lighter. And more flexible, thus improving safety. Iveco bumpers: keeping your body in great shape.**

## ORIGINAL IVECO HEADLAMPS: CLEAR BENEFITS.

Headlamps, the eyes of your Iveco vehicle: crucial elements for a level of safety that only Original Parts can guarantee. To see and be seen, and to save money through improved consumption.

### ORIGINAL IVECO HEADLAMPS

**Perfectly clear view.** They are designed to illuminate the road ahead efficiently.

**Wear resistance.** They are a perfect fit and offer guaranteed durability.

**Lowering consumption.** They contribute to fuel savings because they maximise energy efficiency.

### LOW QUALITY HEADLAMPS

Using low quality products means uneven and more limited vision and less visibility for the vehicle.

**Lower quality headlamps wear out more quickly** because they are not fully compatible with the vehicle.

**Non-original components will wear out more rapidly.**

**Only original Iveco headlamps meet the rigorous technical specifications and ensure rapid and safe repairs and replacement, with quick and precise assembly.**

## IVECO ORIGINAL WINDSCREENS: CLEAR AND STRONG BENEFITS.

For the driver's safety the windscreen plays a crucial role. Choosing the original Iveco part is a genuine guarantee of safety.

### IVECO ORIGINAL WINDSCREENS

With full compliance to international standards, original windscreens are subject to additional tests which certify the correct interaction with the vehicle and the high performance levels.

### LOW QUALITY WINDSCREENS

Lower quality windscreens, even if they have the mandatory type-approval, will never have the type-approval and the security provided by passing the additional tests set by Iveco.

All original windscreens are laminated windscreens, formed of two panes of glass bonded by an adhesive interlayer. In the event of an impact and breakage, the various glass fragments will stay attached to the adhesive layer, preventing injuries to the driver and passengers.

**INNER PANE**  
Glass pane in contact with the inside of the cab. The type-approval code of the windscreen is screen printed on this pane.

**OUTER PANE**  
Glass pane facing outwards.

**INTERLAYER OF PVB**  
It works as an adhesive between the two panes, improving the mechanical, thermal and acoustic properties of the windscreen.
