IVECO

Austrian Federal Minister Niki Berlakovich drives Iveco ECODAILY Electric

The Austrian Federal Minister of Environment Mr. Niki Berlakovich tested the Iveco ECODAILY Electric in the city centre of Vienna. Mr. Berlakovich was impressed by the powerful acceleration, great agility and fully availability of 12 m3 cargo space of the ECODAILY Electric, which represents the future of urban transportation.

In fact, it is an electrically-driven vehicle with zero exhaust emissions, designed, built, marketed and fully assisted by Iveco, a precursor of electrically-powered vehicles, who designed and built the first electric Daily in 1986.

The Austrian Federal Minister of Environment himself drives an electrically powered car.

The ECODAILY Electric is available as Van or Chassis Cab up to 3 t payload. The vehicle adapts perfectly to the most common missions in urban areas, such as door-to-door distribution and the urban passenger transport.

During several months, the ECODAILY Electric will be tested by the Austrian press and potential customers.

Iveco

Iveco designs, manufactures, and markets a broad range of light, medium and heavy commercial vehicles, off-road trucks, city and intercity buses and coaches as well as special vehicles for applications such as fire fighting, off-road missions, defence and civil protection.

Iveco employs almost 25,000 people and runs 23 production units in 10 Countries in the world using excellent technologies developed in 6 research centres. Besides Europe, the company operates in China, Russia, Australia and Latin America. Around 5,000 sales and service outlets in over 160 Countries guarantee technical support wherever in the world an Iveco vehicle is at work.
