

IVECO launches its natural gas powered vehicles on the Japanese market: Stralis NP 400, the first ever Liquefied Natural Gas truck ready for sale in Japan, and the Daily Blue Power Family, “International Van of the Year 2018”

IVECO launches its wide offering of natural gas powered commercial vehicles for people and goods transport, with a display of its Stralis NP 400 and the Daily Blue Power Family at the Japan Truck Show, from May 10th to 12th

The Stralis NP 400 is the first natural gas truck specifically designed for long distance transport and the first to be ready for sale in Japan. The Daily Blue Power family is also commercially available in its Daily Hi-Matic Natural Power and Daily Minibus Natural Power versions

IVECO signs an agreement with Fuji Transport for the sale of the first IVECO Stralis NP 400 Liquefied Natural Gas truck (LNG), which will be used in its operations for selected customers and in a collaboration with the government's LNG Working Group.

Turin, 10th May 2018,

IVECO presented the latest **developments in its action plan to support the use of natural gas in the transport sector in Japan**. The event, held on May 8th at the Nippon Press Centre in Tokyo, was attended by Pierre Lahutte, IVECO Brand President; Takao Kashiwagi, Professor at Tokyo Institute of Technology and Chairman of the LNG Expert Committee; Hiroaki Matsuoka, President of Fuji Transport Corporation; Mariarosa Baroni, President and CEO of NGV Italy, and Jean-Claude Girot, President of the French Natural Gas Vehicles Association (NGV France) and General Commissary of the Paris Motor Show, as well as distinguished guests from government, media and the transport sector. IVECO's plan of action comes on the back of the **Memorandum of Cooperation that the Ministry of Economy, Trade and Industry of Japan** signed with the European Commission last year for the development of advanced technologies for the use of LNG powertrains in road and maritime transport.

The brand announced the public launch of the **Stralis NP 400**, the first heavy-duty natural gas vehicle ready for sale on the Japanese market. It is the first natural gas specifically designed for long distance transport, and can run on Liquefied (LNG), Compressed Natural Gas (CNG), or a combination of the

two. Also commercially available is the new Daily Blue Power range, “International Van of the Year 2018”, in its **Daily Hi-Matic Natural Power** and **Daily Minibus Natural Power** versions, the first CNG vehicles with an 8-speed automatic gearbox – the perfect combination of low emission fuel and driveability for urban areas with the class-exclusive Hi-Matic transmission.

In addition, IVECO announced the signing of an **agreement with Fuji Transport** for the sale of the first LNG truck in Japan, an IVECO Stralis NP 400 running on LNG only. Fuji Transport will use the vehicle on the Tokyo-Osaka route as well as in its operations for selected customers that include the Japan Postal Service, and will monitor and analyse the performance of the Stralis NP 400 with its telematics and GPS systems.

By demonstrating in real transport conditions the practicality and benefits of natural gas in transport, the vehicles will play a key role in the brand's plans to support the transition to this sustainable energy source in Japan. The two new ranges will make their public debut at the Japan Truck Show in Yokohama.

Pierre Lahutte, IVECO Brand President, stated: *“Less than a year ago, the Japan Ministry of Economy, Trade and Industry (METI) and the European Commission signed a Memorandum of Cooperation on the development of Liquefied Natural Gas (LNG) fuel in road and maritime freight applications. Here we are today launching our natural gas ranges and selling the first LNG truck that will operate on one of the busiest freight routes in the world, Tokyo-Osaka, with around 100,000 trucks driving it every day. The autonomy and environmental benefits of the Stralis NP 400, together with the LNG distribution plan developed by Shell along Japan’s main freight routes, make it the perfect vehicle for the transition to clean and sustainable long-distance transport.”*

This established experience in pioneering natural gas technologies and providing an extensive natural gas offering places IVECO in an excellent position to be a key player in Japan’s natural gas transport market as the ideal partner for the country's transport operators.

IVECO

IVECO is a brand of CNH Industrial N.V., a World leader in Capital Goods listed on the New York Stock Exchange (NYSE: CNHI) and on the Mercato Telematico Azionario of the Borsa Italiana (MI: CNHI). IVECO designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks, and vehicles for applications such as off-road missions.

The brand's wide range of products include the Daily, a vehicle that covers the 3 – 7.2 ton vehicle weight segment, the Eurocargo from 6 – 19 tons, the Trakker (dedicated to off-road missions) and the Stralis, both over 16 tons. In addition, the IVECO Astra brand builds off-road trucks, rigid and articulated dumpers as well as special vehicles.

IVECO employs close to 21,000 individuals globally. It manages production sites in 7 countries throughout Europe, Asia, Africa, Oceania and Latin America where it produces vehicles featuring the latest advanced technologies. 4,200 sales and service outlets in over 160 countries guarantee technical support wherever an IVECO vehicle is at work.
