

Press Release

UK supermarket Tesco expands home delivery electric fleet with 151 IVECO eDaily vehicles

- The first unit of 151 eDaily chassis cabs has been delivered to Tesco, with the remaining units to join its electric IVECO fleet later in the year.
- IVECO is supporting the supermarket on its decarbonisation journey with its eDaily vehicles in a two-battery configuration specified to optimise payload and range.

Turin, 6 March 2024

IVECO has delivered the first eDaily to Tesco, the UK's leading supermarket, which is taking forward its decarbonisation journey. This two-battery vehicle, which is joining Tesco's home delivery fleet, has been specified to optimise payload and range. A further 150 eDaily two-battery models will join the expanding Tesco EV fleet towards the end of 2024.

This first new eDaily (42S14E) enables zero-emissions deliveries to customers via its innovative modular battery setup. Its electric motor efficiently provides strong performance with 140kW and 400Nm of torque deployable. Capable of rapid charging at 80kW, up to 100 km of range can be reached in just 30 minutes, while a 22kW onboard charger enables Tesco to maximise charging from AC chargers at local stores. The refrigerated body can take full advantage of the 15kW e-PTO to cool perishable goods while on delivery missions. A second 12V e-PTO provides low-voltage power for additional cooling, creating a totally self-sustaining zero-emissions vehicle. Tesco is also benefiting from the eDaily's advanced connectivity features that can control the vehicle's driving modes, remotely selecting the best for optimised performance and efficiency.

The Daily has been a familiar sight on the nationwide Tesco delivery fleet since 2010. Its class-leading turning circle, which makes manoeuvring effortless, is a strong asset for drivers frequently operating in urban missions. Drivers will find the transition to the all-electric eDaily easy, as they are specified with IVECO's Hi-Matic automatic transmission, also featured in the fleet's diesel vehicles.

IVECO

IVECO is the brand of Iveco Group N.V. (EXM: IVG) that designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks and vehicles suitable for any body type.

It constantly innovates and extends its product portfolio to provide every customer with the vehicle that matches their mission precisely. Its full-line offer is designed around the Driver's needs to deliver an excellent experience with a focus on safety and comfort. A wide range of advanced digital, connectivity-enabled services developed to help fleet owners run their fleet efficiently enhance IVECO's complete transport solution.

IVECO pursues its decarbonisation strategy through a multi-energy approach that includes the further development of bio-methane, battery electric and fuel cell technologies.

IVECO operates 6 manufacturing plants and 7 research and development centres. It counts on 3,500 sales and service points in over 160 countries, which guarantee technical support wherever an IVECO vehicle is at work.

IVECO drives the road of change by powering the transformation of the transport industry, propelled by the ambition to be the most reliable partner and full-line player for its customers.
