### **'Forward-thinking' IVECO eDaily wins 'Electric Van Breakthrough of the Year' Award**

*eDaily recognised as impressive electrification enabler for its innovations in eLCV technology and mission-focus*

*Turin, 21<sup>st</sup> March 2024*

The IVECO eDaily has added to its growing collection of industry accolades, winning the 'Electric Van Breakthrough of the Year: Model' at the 2024 Fleet News Awards, an annual competition celebrating the best of corporate motoring in the UK, from fleet managers to suppliers and manufacturers.

A panel of industry experts recognized the eDaily for its innovations in eLCV technology and a mission-focus that is enabling operators working even the most demanding missions to go electric without compromise. The jury stated *"from a technical point of view, IVECO is very forward-thinking. With the eDaily it takes a mission-critical approach that mirrors diesel van operation, enabling all customers to consider EV no matter the use case."*

Daily is the toughest among light commercial vehicles; the eDaily has the same impressive capabilities - with zero emissions. Utilising a strong truck-based chassis, the all-electric IVECO eDaily enables an unrivalled up to 3.5-tonne towing capacity and up to 4.6-tonne payload. An innovative modular battery setup with one, two, three batteries (and now a fourth battery available on the 72C 7.2 tonne GVW 5100mm chassis cab) – allows operators to perfectly balance the demands of payload and range. The battery's interchangeable nature allows ultimate fleet flexibility should a vehicle's role change. The eDaily enables more operators to consider electrification, retaining the IVECO Daily's rugged DNA while adding impressive EV performance.

Another game-changing trait of the eDaily is its unmatched up to 50kW ePTO onboard power. As the only eLCV currently on sale to provide a 50kW ePTO, the vehicle's power applications are wide-ranging and capable of powering everything from bespoke bodies to essential equipment.

## IVECO

IVECO is the brand of Iveco Group N.V. (EXM: IVG) that designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks and vehicles suitable for any body type.

It constantly innovates and extends its product portfolio to provide every customer with the vehicle that matches their mission precisely. Its full-line offer is designed around the Driver's needs to deliver an excellent experience with a focus on safety and comfort. A wide range of advanced digital, connectivity-enabled services developed to help fleet owners run their fleet efficiently enhance IVECO's complete transport solution.

IVECO pursues its decarbonisation strategy through a multi-energy approach that includes the further development of bio-methane, battery electric and fuel cell technologies.

IVECO operates 7 manufacturing plants and 8 research and development centres. It counts on 3,500 sales and service points in over 160 countries, which guarantee technical support wherever an IVECO vehicle is at work.

IVECO drives the road of change by powering the transformation of the transport industry, propelled by the ambition to be the most reliable partner and full-line player for its customers.
