

## IVECO delivers fire-fighting trucks to Kertajati International Airport

*The delivery of two IVECO trucks adds to more than 40 fire-fighting vehicles deployed by IVECO to Indonesian airports in the last 9 years.*

Jakarta, December 2018

IVECO has recently delivered two trucks at the Kertajati International Airport, West Java, for the Airport Rescue and Fire Fighting (ARFF) services. The two IVECO vehicles – a Trakker and an Astra – have been very well received by the airport's fire fighters, who recognize the high quality, reliability and robustness of these fire-fighting vehicles, which are critical in rescue and fire missions in Indonesia. Since 2009 IVECO has supplied more than 40 fire-fighting trucks to airports across Indonesia.

Speaking at the handover ceremony, Iman Firmansyah, Manager at ARFF of Kertajati Airport said: "We are delighted to have two IVECO trucks in our fleet. These vehicles have passed all our tests including top speed and acceleration, braking test, and water discharge rate and range to ensure our fire brigade crew can work in safety and with high performance during every operation."

The IVECO Trakker, in its 6x4 rigid configuration (380 hp), is designed for the most extreme missions and can be relied on to deliver an exceptionally powerful performance wherever there is a high risk of fire. The delivered truck, modified by specialist bodybuilder Kajama, is built to withstand constant stress, to carry a fire brigade crew, and the equipment needed to extinguish fires. The purpose-built superstructure is equipped with centrifugal water pump, water tank, foam concentrate tank, powder extinguishing system, rapid intervention equipment.

The IVECO Astra HD9, delivered in its 4x4 rigid configuration (540hp), is specifically designed for heavy and special missions that require heavy equipment such as ladders, platforms, water tanks and pumps. With a strong chassis and frame components, the IVECO Astra's rear suspension system is supported by the "Power Ring" tandem lower cross bar, while the reinforced front axle can reach up to 10 tons payload. The high-torque, high-power engine (coupled with fully automatic transmission) enable the IVECO Astra to deliver excellent on-road and off-road mobility and travel at high speed in emergency situations. Strong mechanics and a simple electronic technology guarantee reliability and easy serviceability in all conditions.

IVECO's product offering is complemented by a full range of after-sales services, genuine spare parts support and financing provided by its distributor Chakra Jawara's strong local network in the country.

## IVECO

*IVECO is a brand of CNH Industrial N.V., a World leader in Capital Goods listed on the New York Stock Exchange (NYSE: CNHI) and on the Mercato Telematico Azionario of the Borsa Italiana (MI: CNHI). IVECO designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks, and vehicles for applications such as off-road missions.*

*The brand's wide range of products include the Daily, a vehicle that covers the 3 – 7 ton vehicle weight segment, the Eurocargo from 6 – 19 tons, the Trakker (dedicated to off-road missions) and the Stralis, both over 16 tons. In addition, the IVECO Astra brand builds off-road trucks, rigid and articulated dumpers as well as special vehicles.*

*IVECO employs close to 21,000 individuals globally. It manages production sites in 7 countries throughout Europe, Asia, Africa, Oceania and Latin America where it produces vehicles featuring the latest advanced technologies. 4,200 sales and service outlets in over 160 countries guarantee technical support wherever an IVECO vehicle is at work.*
