## EASE OF ADAPTATION

The Lineo seats are manufactured in two versions: Lineo and Lineo Lux. They are suitable for a wide range of uses, from intercity transport to fully featured touring seats. These modular seats combine comfort with ergonomics and are thus perfect for any use. The wide range of options available confirm the seats' adaptability. Both versions include an adjustable armrest (aisle side), handles that can be installed on the aisle side or on the backrest, footrests, and an elasticated rear magazine net. A retractable armrest (aisle side) comes as standard on the Lineo Lux version that also includes a retractable central armrest as an optional.

## STANDARD OR OPTIONAL ACCESSORIES

The standard or optional accessories are shown for purpose of sample visualization.  
For a complete list of the set of standard and optional accessories proposed throughout the line of Iveco seats, please refer to the table provided on page 7 of this brochure.

## SPACIO AN ELEGANT FLOW

With different upholstery solutions, this new seat has been designed to guarantee the maximum comfort to the passengers in every kind of trip. The elegance stems from the care of details in terms of finishings and materials. Moreover, new Spacio seats offer a complete array of amenities. A reclinable seat back, retractable aisle armrest, handles on the aisle and mounted on the seat backs all come as standard accessories. Moreover, the handle, completely new, is really innovative as it was designed to make easier the hold from the aisle for passengers. And it has a slender and extended profile in the lower part to be accessible to everyone. A hook in the upper part to be used also to hang bags, jackets and other accessories along the trip. Aesthetic, ergonomic and comfortable, new Spacio seats also come with a full complement of options, like a retractable central armrest, a fold-down table on the back rest, a removable headrest, two different versions of bins.

### **STANDARD UPHOLSTERY**

The new Spacio with standard upholstery shown here is characterized by basic technical sewings. The standard has only one colour for the headrest and the front part, a standard moquette grey anthracite in the backrest.

### **EXCELLENCE UPHOLSTERY**

The new Spacio, with Excellence upholstery, has the introduction of lateral piping and the aesthetic sewings, that are an invitation to relax, with their shape running along the seat to highlight the ergonomics and to involve the back of the passengers.

*Note: the Excellence upholstery shown above consists of two tones. It is possible also to have a unique tone.*

### **AMBASSADOR UPHOLSTERY**

The new Spacio with Ambassador upholstery is the most elegant solution with lateral flaps and more aesthetic sewings, in the headrest and laterally in the front part, to have the best finishing for the seat. The application of different leathers is strongly recommended for this type of upholstery to get a luxury seat.
