Difficult mission? Yes, we can. Insurmountable obstacle? Yes, we can. Insuperable limit? Yes, we can.

Yes we can, with the **TRAKKER**, Iveco's quarry and construction vehicle that redefines the meaning of impossible and enables you to work on impenetrable, broken terrain, and tackle constant stresses with extraordinary performance.

The TRAKKER comes with the guarantee of Cursor engines, for maximum power and durability. It offers top quality of life on board too, with three cab versions. And it raises your productivity beyond all limits, while further reducing Total Cost of Ownership **(TCO)** and minimising running costs. What's more, the whole range is ready for conversion and ready for any mission. That's why there's no job it can't do: the TRAKKER is always on hand to turn problems into solutions.

The robustness, reliability and general excellence of the vehicle are so outstanding, that it was picked for the challenge of the Dakar 2012 Rally. And it didn't disappoint: Iveco placed three vehicles in the top six, showing once again that the TRAKKER brings even the most difficult victories within reach, both off-road and on. From the world's toughest rally to the challenges of everyday work. **Trakker is the winner of the Dakar Rally in 2012 and 2016.**

Tested by Dakar.

T R A K K E R

H I - R E L I A B I L I T Y

Rock is immune to the ravages of time. It's indestructible, and impervious to extreme weather and natural phenomena. The TRAKKER works with rock every day, so rock informs its design.

Robustness, reliability and efficiency, combined with the technology of its engines, components and assemblies, make Iveco's quarry and construction vehicle unstoppable and **equal to the toughest challenges.**

Because when you face arduous applications, harsh conditions and hostile environments, it's vital to know you can count on a vehicle that's always reliable and productive, 365 days a year.

ROBUSTNESS

Robustness is one of the qualities that helps the TRAKKER turn the impossible into the possible. Every single component, starting from the **high-yield-strength steel frame**, guarantees durability: the TRAKKER really is a **long-term investment.**

RELIABILITY

To clear the hurdles your work puts in your way, you need a vehicle that's a by-word for reliability. New engineering and technological solutions make the TRAKKER the ideal workmate on every mission, even the seemingly impossible ones.

EFFICIENCY

Any truck that's constantly put to the toughest tests, like the TRAKKER, has to be efficient. TRAKKER offers **class-leading productivity**, and engines and mechanics that take extreme conditions in their stride. So it's on the job 365 days a year, to squeeze even more value out of your time.

MANUAL TRANSMISSION

The gearboxes on the TRAKKER are all about ergonomics and performance. The manual gearbox comes in 16-speed variants.

The innovative **16-speed ZF Ecosplit 4** is equipped with a **servo-shift** system for safer, more comfortable driving.

EUROTRONIC AUTOMATED TRANSMISSION

As well as manual gearboxes, the TRAKKER offers all the technological excellence of **Eurotronic automated transmissions**, which enhance driver comfort with their steering-column-mounted shift lever. They offer fully automatic and semi-automatic modes: you choose which is best for the situation you're in. With Eurotronic, the engine always runs in its most fuel-efficient range, making the vehicle **better and safer to drive.**

The decompression engine brake on the Cursor engines, combined with the action of the **variable-geometry or waste-gate turbo**, depending on engine variant, enables you to slow the vehicle down with less recourse to the service brake and hence less demand on the wear parts, thus extending maintenance intervals, electronically controlled by **ABS and EBL systems** (for optimising brake force according to load), and ASR (anti-slip regulation) as an option.

ROBUST FRAMES

The frames of the TRAKKER are made of high-yield-strength steel, available in two thicknesses: 7.7 mm for applications where tare weight is a priority, and 10 mm for the heaviest duty.

The suspension systems are also highly robust and come in several types: **mechanical with parabolic or semi-elliptical leaf springs** for enhanced comfort.

H I - C O M F O R T & E R G O N O M I C S

Construction work makes big demands on you and your vehicle, but the upgraded **COMFORT** of the TRAKKER will keep you going hour after hour. The efficient air conditioning system and the sound-proofing of the cab ensure top quality of life on board, even in the most adverse conditions.

The TRAKKER is available with **three cab versions:** day cab **(HI-LAND)** with standard roof, and sleeper cab **(HI-TRACK)** with low or high roof. And even the day cab version offers plenty of space behind the driver's seat. All the cabs feature the functional and ergonomic **new dashboard**, made with top-quality, non-reflective, soft-touch materials. The controls have been re-positioned around the dashboard and central area, to make them easily visible and accessible without raising your back from the seat. The new floor is covered with wear-resistant, easy-to-clean material. The layout of the interior offers outstanding practicality: the overhead windscreen storage has plenty of storage compartments, and you'll find other cubby holes in the doors.

There is really a room for everything, such as the **new steering wheel, new upholstery and the new comfortable bunk** to make you feel at home wherever you are; not to mention the central storage console, and even more space behind the driver's seat for clothes hooks.

H I - P E R F O R M A N C E

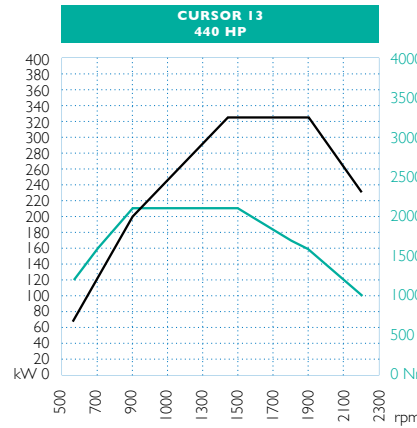

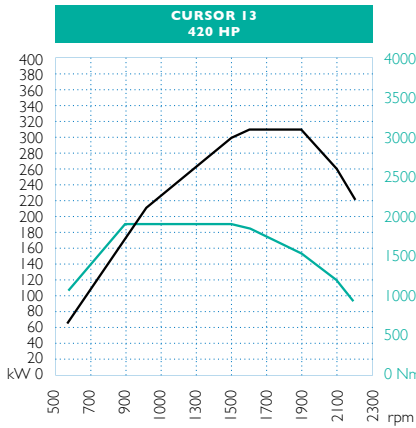

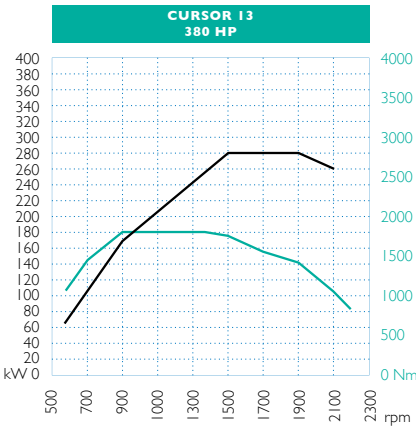

I'M TRAKKER AND MY HEART NEVER STOPS BEATING.

To deliver **excellent performance, low running costs and superior driver comfort.**

THE CURSOR 13 is ideal for the most demanding applications in the toughest environments and most adverse conditions. Available on 380, 420 and 440 HP versions, it delivers high torque at low engine speed, thanks to the waste gate turbo system on 380 HP and 420 HP versions and to the variable geometry turbine on 440 HP version. The result is an improved acceleration and driveability and an increased durability of the clutch and the gearbox. With displacement of 12,880 cm³ and in-line 6-cylinder architecture, the Cursor 13 also meets EURO 3 emissions standards. The in-line 6-cylinder architecture with overhead camshaft and rear-mounted timing gear generates **less noise and vibration, while ensuring fluid** responsiveness in every situation, with obvious benefits for comfort and engine life. Every detail of the Cursor engines has been designed for maximum efficiency: aluminium piston heads facilitate heat dispersal; low-roughness cylinder liners minimise friction; and the four valves per cylinder maximise the efficiency of air flow.

The TRAKKER also mounts a revolutionary, **third-generation INTARDER** to further reduce demands on the service brakes. That's how the TRAKKER pushes back the frontiers of the possible, while ensuring unprecedented safety and reliability.

Engine	Displacement	Turbo	POWER		TORQUE	
			HP	rpm	Nm	rpm
CURSOR 13	12,880 cm ³	WG	380	1900	1800	1000/1435
		WG	420	1900	1900	1000/1435
		VGT	440	1900	2100	1000/1525
